

Our Business Card

The **ROLAND Logistik GmbH** has its roots in the field of the project logistics. The project logistic itself is already a challenge for every freight forwarder. However, we advanced one step further and focused on the very challenging areas of the world. Having an own office in Libya, representatives in IRAN and a network of highly specialized partners in the Arabic and the South American world brings us in a position to offer complete logistic packages on the highest quality level.

Especially in logistics is sophisticated, professional communication combined with the understanding of the various cultures the key to a successful supply-chain-management.

We do speak the languages of the destinations; even Arabic and Persian....

Know-how and **know-who** are the Yin and Yang of the logistics. Both components determine the level of the service quality.

See for yourself, we are delighted to oblige...

ROLAND Logistik GmbH
